

## Monarch Butterfly and Pollinators: 2024 Report

#### **FUNDING PARTNERS**

- USDA Natural Resources
   Conservation Service
- U.S. Fish and Wildlife Service
- Bureau of Land
   Management
- U.S. Forest Service
- Bayer Crop Science
- Danone North America
- The Scotts Miracle-Gro Foundation

Monarch butterfly

Since 2015, the Monarch Butterfly and Pollinators Conservation Fund has awarded approximately \$29 million to 156 projects that are helping conserve and recover the imperiled monarch butterfly and other pollinators. Grantees have matched this investment with an additional \$43.9 million, for a total on-the-ground impact of more than \$72.9 million.

#### martered by Congress in 1984. MONARCH BUTTERFLY AND POLLINATORS CONSERVATION FUND: 2024 REPORT

The monarch butterfly is one of the most iconic species in North America, and its annual migration cycle is one of the most remarkable natural phenomena in the world. However, during the past 20 years, the monarch butterfly population has declined by more than 80 percent throughout much of its range. Pollinators such as the federally endangered rusty patched bumble bee are also experiencing population declines. Habitat loss is one of the primary factors challenging pollinators.

In response to this threat, the National Fish and Wildlife Foundation (NFWF) established the Monarch Butterfly and Pollinators Conservation Fund in 2015 to protect, conserve and increase habitat for pollinators. Partners include U.S. Department of Agriculture's Natural Resources Conservation Service, the U.S. Fish and Wildlife Service, Bureau of Land Management, U.S. Forest Service, Bayer Crop Science, Danone North America and The Scotts Miracle-Gro Foundation. The program invests in projects that improve the availability of high-quality habitat, increase the capacity needed to expand conservation efforts into the future, and support implementation of technical assistance to engage private landowners with pollinator conservation practices on working lands. By leveraging the resources and expertise of its partners in this way, the program is helping to reverse recent population declines and ensure the survival of monarch butterflies and other pollinators.

#### **ABOUT NFWF**

Chartered by Congress in 1984, the National Fish and Wildlife
Foundation (NFWF) protects and restores the nation's fish, wildlife, plants and habitats.
Working with federal, corporate and individual partners, NFWF has funded more than 6,800 organizations and generated a total conservation impact of more than \$10 billion.

## Monarch Butterfly and Pollinators Conservation Fund

156

Projects funded

3,400

Pounds of native milkweed seed collected

1,800

Workshops or meetings hosted

416,000

Acres restored or enhanced

1.1 million Native milkweed seedlings propagated

### Monarch Butterfly and Pollinators Conservation Fund

Rusty patched bumble bee

## INCREASING THE QUALITY AND QUANTITY OF HABITAT

The goal of this conservation strategy is to create and sustain a connected patchwork of pollinator habitat to support at-risk pollinators and the monarch butterfly. It emphasizes restoring and enhancing land to support ample milkweed and nectar plants as well as overwintering habitat. This strategy also seeks to ensure adequate supply of native milkweed and nectar-producing plant seeds or plugs for habitat restoration efforts.

#### PROJECT EXAMPLE: Ecoregional Seed Program for Monarchs across Eastern Broadleaf Forest

NFWF Award Amount	\$150,000
Matching Funds	\$485,080
Total Project	\$635,080

The Pollinator Partnership established a seed collection program for the Eastern Broadleaf Forest and provided technical assistance to public and private land managers in five states. The project collected 60 pounds of milkweed seed and propagated 11,000 seedlings to support the improvement of 27,000 acres of monarch habitat.

#### COORDINATION, CAPACITY BUILDING

The goal of this conservation strategy is to increase organizational capacity and coordination among organizations, states, and regions engaged in pollinator conservation. Grant funding supports work to develop regional strategies and plans, build capacity and expertise, maximize information exchange, and distribute information about on-the-ground conservation practices.

#### PROJECT EXAMPLE: Developing a Central Flyway Monarch Conservation Strategy

NFWF Award Amount	\$144,750
Matching Funds	\$170,000
Total Project	\$314,750

The Midwest Association of Fish and Wildlife Agencies led a regional coordination process to develop a Central Flyway Monarch Conservation Strategy for states located along the eastern monarch migratory corridor. The project established common habitat and population goals, as well as strategies and monitoring protocols to be implemented at the state level.

## TECHNICAL ASSISTANCE FOR PRIVATE WORKING LANDS

This conservation strategy supports implementation of technical assistance to increase the number of private landowners engaged in pollinator conservation practices on private working lands.

# PROJECT EXAMPLE: Using Technical Assistance to Increase Resource Conservation District Effort for Monarchs

NFWF Award Amount	\$300,000
Matching Funds	\$800,000
Total Project	. \$1,100,000

The California Association of Resource Conservation Districts provided technical assistance on private working lands by hiring a statewide Monarch Project Coordinator and a Technical Assistance Trainer. The project developed 120 pollinator conservation plans, improved 2,391 acres of habitat, coordinated 110 meetings and workshops, and reached 900 landowners.
